Education

JSPM RSCOE

B Tech in Information Technology { CGPA-7.62 }   *Pune, Maharashtra*

Technical Skills

Languages & Frameworks: Dart, Java, JavaScript, C/C++, PHP, Flutter, React Native, Selenium, TestNG, Node.js
Tools & Concepts: Firebase, Docker, GCP, Figma, CI/CD.

Experience

Accenture   **February 2025 – 20 June 2025**

Quality Engineering Intern

- Developed Selenium UI test cases in Java and TestNG for clients like Ozexport, Coloriginz, and Hamiplant.
- Automated filter testing, verified URL and UI states, and added screenshot capture for failed tests.
- Participated in Agile ceremonies and daily MS Teams stand-ups to sync on progress.
- Analyzed T-log cronjob behavior and proposed custom cleanup strategies.
- Studied field removal impact on performance and reviewed `robots.txt` for SEO improvements.

Ridvig Technologies   **November 2024 – May 2025**

Flutter Intern

- Developed a cross-platform app from scratch using Flutter, integrating REST APIs, Firebase Authentication, real-time storage, and cloud file handling.
- Built pixel-perfect, Figma-based UIs and followed feature-based clean architecture for modular, scalable code.
- Collaborated via pair programming and conducted code reviews to improve logic, performance, and maintainability.

QUAN Company   **August 2024 - September 2024**

Flutter Intern

- Identified and resolved **pre-existing bugs** across Android and iOS, while utilizing **Hive** for local storage to enhance performance and data persistence.
- Implemented a **CI/CD pipeline** for automated testing, builds, and deployment, streamlining the release process and ensuring continuous integration of the **backend** with the **frontend** for real-time interactions.
- Applied the **Bloc state management** pattern to manage complex app states, delivering predictable and efficient UI updates, while improving the overall user experience.

Projects

Habits Tracker   **Flutter, Firebase, Node.js, AWS DyanmoDB, CodeMagic CI/CD**

- Developed a sophisticated habit tracking application with an intuitive UI, utilizing **Firebase NoSQL Database** for **real-time data** and **Firebase Authentication** for secure user management.
- Implemented **localized notifications** and automated **APK builds** through **CodeMagic CI/CD** to enhance user engagement and streamline deployment.
- Applied **object-oriented principles** for a scalable architecture, ensuring seamless **cross-platform compatibility**.
- Engineered the **backend** using **Node.js**, enabling seamless **data backup** to **AWS** for enhanced data security and reliability.

SnapNote   **React Native, JavaScript, MySQL, PHP, Docker, Codemagic CI/CD**

- Crafted a cross-platform mobile note-taking application using **React Native**, incorporating **React Navigation** for a fluid user experience.
- Implemented **Redux** for sophisticated state management and **PHP** for backend services, with **MySQL** data management on localhost.
- Streamlined build and deployment processes via **Codemagic CI/CD**, ensuring rapid updates and top-tier application quality.

FlutterFeed   **Flutter, Firebase**

- Developed a Twitter-like app using **Flutter**, **Firebase**, and **Riverpod**, replicating key Twitter features.
- Utilized **Firebase** for **real-time database management**, user authentication, and storage, with **Go-Router** for navigation.
- Implemented **Riverpod** for efficient state management, enhancing performance and scalability.

Achievements

- **Manav Tore - LeetCode** - Solved 475+ problems, demonstrating strong algorithmic and problem-solving skills.
- Obtained Leetcode Contest Rating of 1763 (Top 9.17%).
- Won 3rd Prize at Recursion Coding Competition at JSPM RSCOE.
